WE BUILD THE FUTURE

It is a time of paradigm shift, with changes in housing formats, in the functionalities of offices, in hotel approaches designed to ensure the needs of their guests, or in the needs of hospitals to ensure a better patient experience.

The future of the sector comes by putting people at the center of the building, we have to build thinking about the welfare and health of the people who inhabit these spaces.

REBUILD is the main meeting forum to share, transmit, show and present all these new changes to all the agents of the value chain. All this in order to have an industrialized and more competitive, technological and digitized sector that once again becomes the economic engine of our country. Similarly, it is a priority duty to comply with the Sustainable Development Goals when creating new projects and investing in a more sustainable future for the environment and the future of humanity.

OFFSITE CONSTRUCTION, DIGITALIZATION AND SUSTAINABILITY

REBUILD has established itself as the only event to drive and promote the change in the construction model of building. A transformation that will be consolidated in the coming years through industrialization, digitalization, design and different solutions in terms of sustainability.

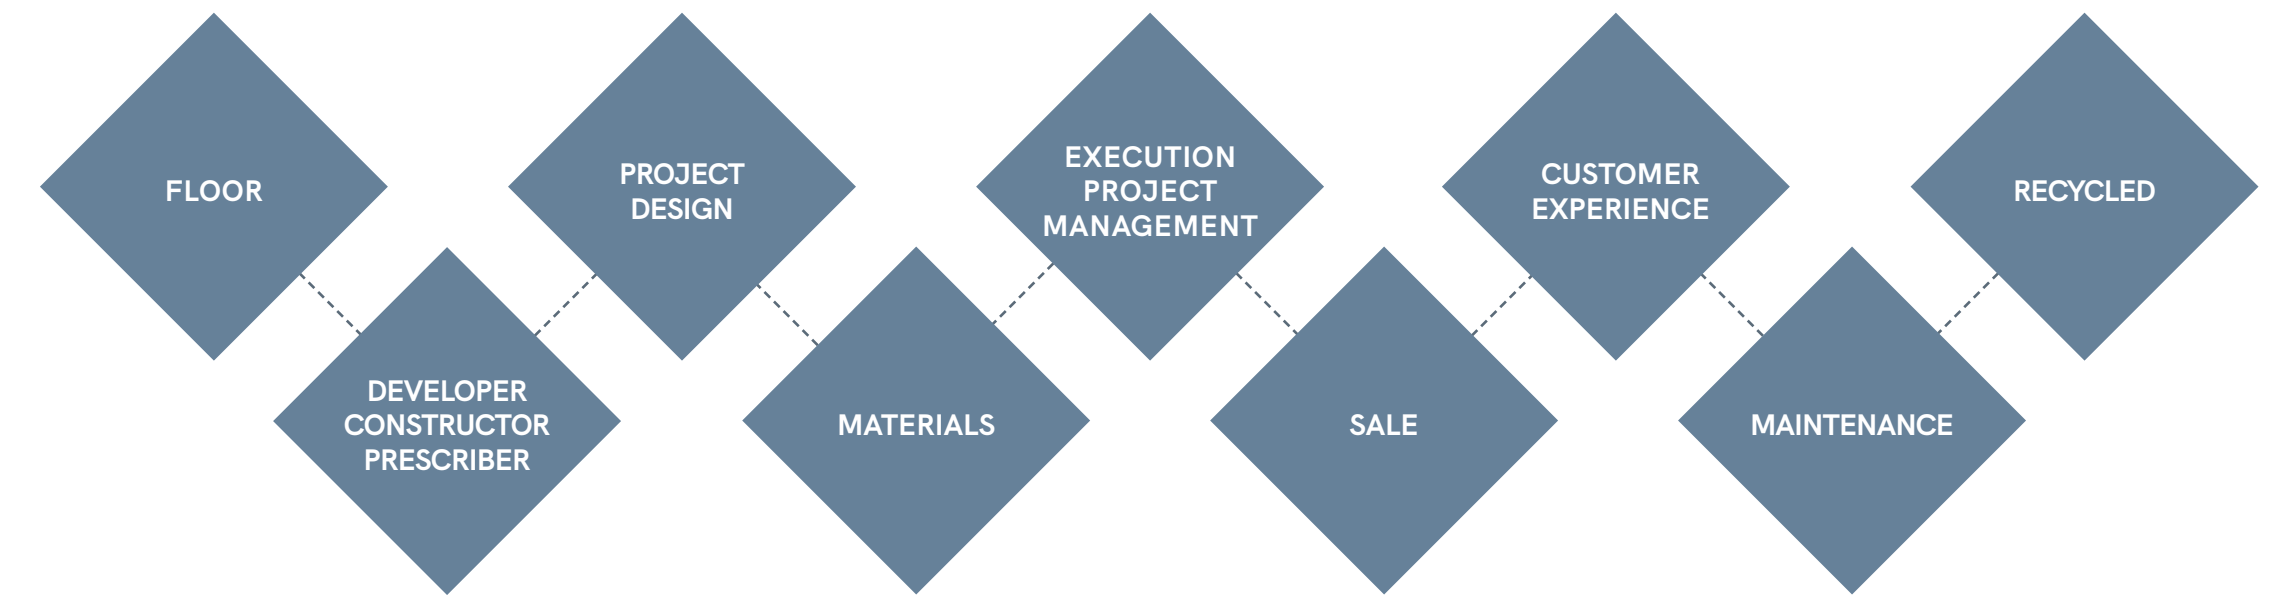

An innovation platform for manufacturers and distributors:

- Identify new builders, developers, investors, contractors, architects, technical architects, public managers, engineers and installers, interior and product designers, who are looking for their industrial partner in REBUILD to develop their projects.
- Generate new high quality contacts and build

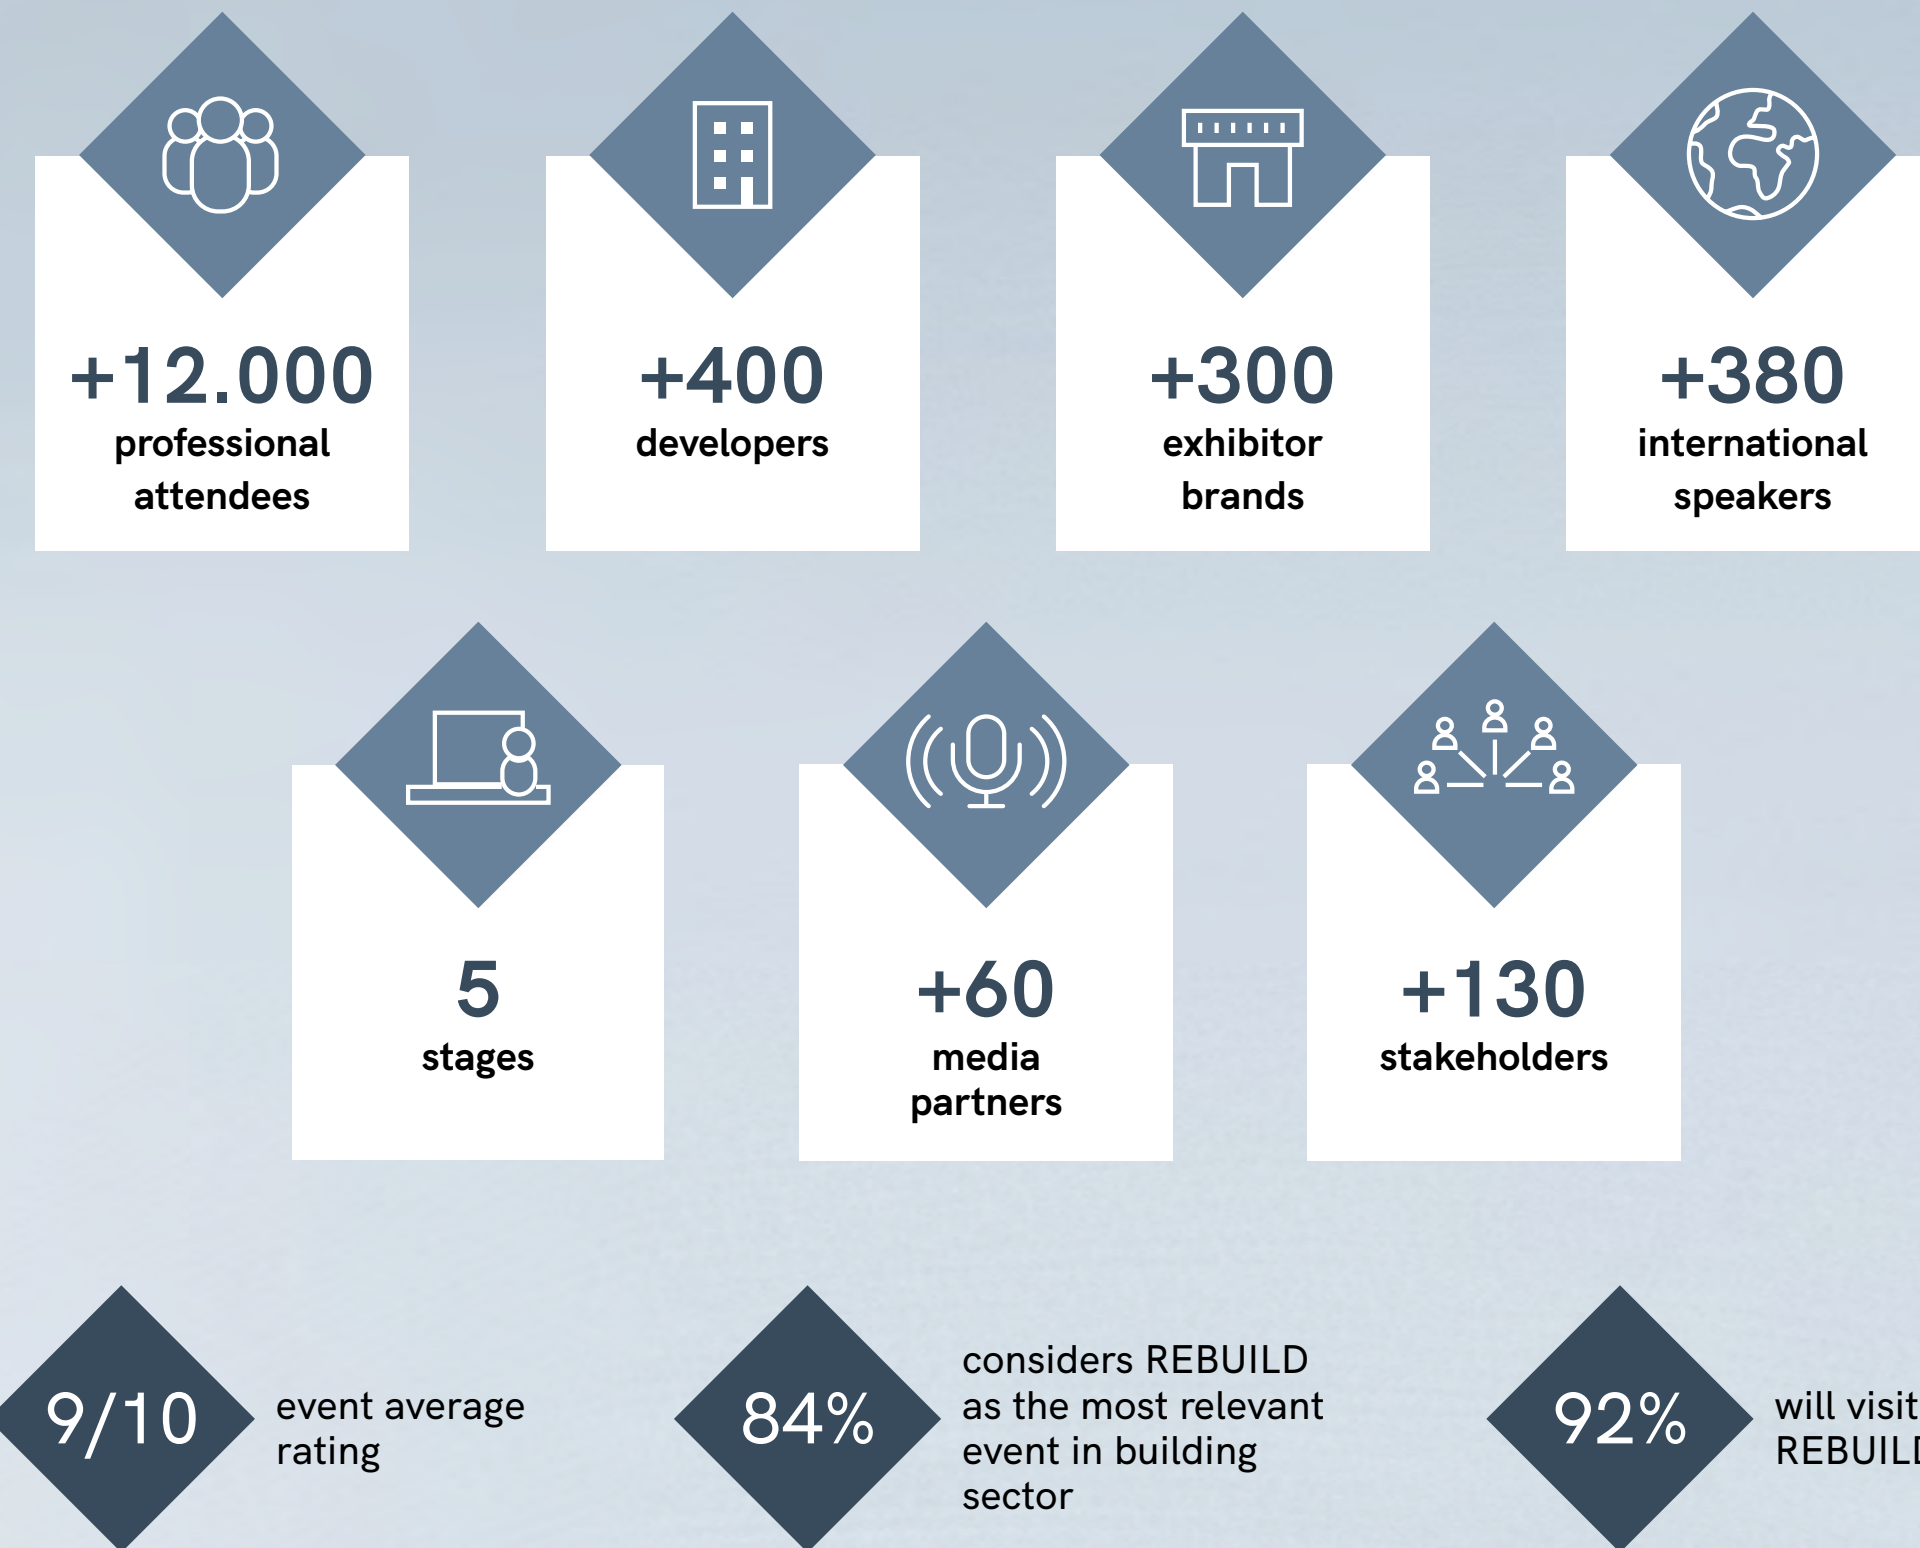

customer loyalty.

- Show your leadership and positioning by the added value you bring to the sector.
- Present your new products and solutions to the industry, thus boosting your sales strategy.
- Communicate and associate as an industrial partner in the framework of the event that will transform the building industry.
- Participate in the National Congress of Advanced Architecture and Construction 4.0, the largest knowledge forum to solve the challenges of the new building and draw the roadmap for the next decade, with a specific agenda for each professional profile, and with sessions dedicated to the key issues of the moment.

A MEETING WITH ALL THE AGENTS OF THE BUILDING VALUE CHAIN
